

**AMENDMENTS TO THE CLAIMS**

1. (Original) A process for the preparation of a self-dispersing or self-emulsifying tablet, which is characterized in the following steps,

granulation of a heated granulation mixture containing an active lipophilic substance and a surfactant into granules,

cooling said granules to a semi-solid state,

mixing said semi-solid granules with one or more fillers to cover the surface of the granules,

sieving of the covered granules into a size below 1 mm,

mixing of the sieved granules with tableting aids, and compressing said mixture into tablets.

2. (Original) A process according to claim 1, which is characterized in the following steps,

granulation of a heated granulation mixture containing an active lipophilic substance, a lipid and a surfactant into granules,

cooling said granules to a semi-solid state,

mixing said semi-solid granules with one or more fillers to cover the surface of the granules,

sieving of the covered granules into a size below 1 mm,  
mixing of the sieved granules with tableting aids, and compressing said mixture into tablets.

3. (Original) A process according to claim 1 or 2, characterized in that the granulation mixture in addition contains one or more fillers.

4. **(Currently Amended)** A process according to claim 1, characterized in that the semi-solid granules are covered by a powdered filler having a particle size of 1-250  $\mu\text{m}$ , ~~preferably 50-150  $\mu\text{m}$ .~~

5. (Previously Presented) A process according to claim 1, characterized in that the surfactant is selected from the group consisting of fatty acid esters of glycerol, and fatty acid esters of polyethylene glycol.

6. (Previously Presented) A process according to claim 1, characterized in that a binder is added to the semi-solid granules.

7. (Original) A process according to claim 6, characterized in that the binder is added to the granulation mixture.

8. (Original) A process according to claim 6, characterized in that the binder is added as a dry powder together with the tableting aids.

9. (Previously Presented) A tablet, characterized in being prepared by a process according to claim 1.
